

ENVIRONMENTAL POLICY

1. Scope

The Environmental Policy applies to the following organisations;

- Niterra UK Ltd.

2. Purpose

To provide information on Niterra UK Ltd's Environmental Policy.

3. General Information

Niterra UK Ltd. is committed to working towards environmental sustainability.

We aim to limit our environmental impact by adhering to a principle of producing high quality products that remain efficient throughout their entire life cycle. This principle is carried across the full range of Niterra UK Ltd.'s spark plugs, sensors, ignition coils and products.

To achieve our environmental commitment, and as a way of accepting our legal, moral, and social responsibility as a trusted corporation, we have formulated an environmental action plan. With the participation of everyone concerned, we will pursue the development of a sustainable business and society in our role as a distribution centre.

In pursuit of its environmental aims, Niterra UK Ltd. will abide by all laws, regulations, protocols and relevant voluntary standards relating to environmental conservation, including maintaining our ISO 14001:2015 accreditation.

As a company Niterra UK Ltd., will strive to create a working environment that enables all employees to contribute to the continuous improvement of the ISO14001:2015 framework through competent and effective communication. Targets and objectives are set on an annual basis by Top Management to ensure that we meet our KPIs 100%. Progress is tracked and reviewed on a regular basis.

We also aim to increase our environmental efficiency by continually trying to enhance our environmental management system (EMS) and performance year on year. We also aim to increase our environmental efficiency by continually trying to enhance our environmental management system (EMS) and performance year on year. We also aim to increase our environmental efficiency by continually trying to enhance our environmental management system (EMS) and performance year on year.

We also aim to increase our environmental efficiency by continually trying to enhance our environmental management system (EMS) and performance year on year. We also aim to increase our environmental efficiency by continually trying to enhance our environmental management system (EMS) and performance year on year. We also aim to increase our environmental efficiency by continually trying to enhance our environmental management system (EMS) and performance year on year.

We will remain constantly aware of the need for environmental harmony, working to prevent air, earth and water pollution; use energy and resources more effectively; reduce waste materials; and recycle all waste when possible.
